

IMPORTANT INFORMATION ABOUT YOUR DRINKING WATER

This notice contains

important information regarding your drinking water

MONITORING REQUIREMENTS NOT MET FOR [Stagecoach Trails RV Resort]

Our water system failed to monitor as required for drinking water standards during the past year and, therefore, was in violation of the regulations. Even though this failure was not an emergency, as our customers, you have a right to know what you should do, what happened, and what we did to correct this situation.

We are required to monitor your drinking water for specific contaminants on a regular basis. Results of regular monitoring are an indicator of whether or not our drinking water meets health standards. During 01/16/2025 through 04/16/2025, we failed to test for Nitrates and therefore, cannot be sure of the quality of our drinking water during that time.

What should I do?

- There is nothing you need to do at this time.
- The table below lists the contaminant(s) we did not properly test for during the last year, how many samples we are required to take and how often, how many samples we took, when samples should have been taken, and the date on which follow-up samples were (or will be) taken.

Este informe contiene información muy importante sobre su agua potable.

Tradúzcalo o hable con alguien que lo entienda bien.

REQUISITOS DE MONITOREO INCUMPLIDOS PARA Stagecoach Trails RV Resort

Nuestro sistema de agua no realizó el monitoreo requerido para los estándares de agua potable durante el año pasado y, por lo tanto, infringió las regulaciones. Si bien esta falla no fue una emergencia, como cliente, tiene derecho a saber qué debe hacer, qué sucedió y qué hicimos para corregir esta situación.

Estamos obligados a monitorear su agua potable para detectar contaminantes específicos regularmente. Los resultados del monitoreo regular indican si nuestra agua potable cumple con los estándares de salud. 01/16/2025 through 04/16/2025 No pudimos realizar la prueba de nitrates y, por lo tanto, no podemos estar seguros de la calidad de nuestra agua potable durante ese período.

¿Qué debo hacer?

- No es necesario que haga nada en este momento.
- La siguiente tabla enumera los contaminantes que no analizamos adecuadamente durante el último año, cuántas muestras debemos tomar y con qué frecuencia, cuántas muestras tomamos, cuándo debimos haberlas tomado y la fecha en que se tomaron (o se tomarán) muestras de seguimiento.

Contaminant	Required Sampling Frequency	Number of Samples Taken	When All Samples Should Have Been Taken	When Samples Were or Will Be Taken
Nitrates	Annual monitoring routine Nitrate test	No test was taken or submitted by the State permitted laboratory.	December 31 2024	April 2025

What happened? What is being done?

A routine annual nitrate monitoring test due 12/31/2024 was omitted in error. A re-test was scheduled for April of 2024. The results of the re-test were in compliance with State law.
